Education

Physicist *Eötvös Loránd Univ.* 1986
Computer mathematician *Eötvös Loránd Univ.* 1981

Scientific degree/Scholarships

Habil. Doct.: Computer Sciences *Eötvös Univ.* 2017
Habil. Doct.: Multidisciplinary Natural Sciences *Eötvös Univ.* 2017
Ph.D: Computer Mathematics *Eötvös Univ.* 2006
Dr.Univ.: Statistical Physics *Eötvös Univ.* 1993
Scholarship: Particle Physics *Eötvös Univ. Dept. of
Theor. Phys. and Wigner Inst.* 1997-2002

Employment/Professional experience

assoc. prof. *Eötvös Loránd Univ., Dept. of Computer Algebra* 2006-
res. fell. *Wigner Inst., Dept. of Part. Phys.* 1994-1997
assist. prof. *Eötvös Loránd Univ., Inst. of Solid State Phys.* 1986-1993
postdoc. pos. *Justus Liebig Univ., Dept. of Theor. Phys., Giessen, Germany* 1995
postdoc. pos. *Patras Univ., Dept. of Mathematics and Center for Res. and Appl. of
Nonlin. Syst., Greece* 1994

International Collaboration

NA61 Collaboration CERN, Switzerland 2006-2015
CBM Collaboration GSI, Germany 2008-2009

Language skills: English

Scientific activity

Research Field

Numerical model in the Experimental and Theoretical Physics
Quantum computing
Entanglement of many-body Qbits systems
Nonlinear behaviour of the Lattice Gauge Fields Theory (Yang-Mills Fields)
Reconstruction of the path trajectory in the experimental particle physics
Chaos in Dissipativ and Hamiltonian systems
Fractals in the Generalized Number Systems

Organisation of Conference

- 2013: **Number, Function and Equations NFE'13**
 Location: Visegrád, 2013 June 28-30 (member of organization committee)
 (It was dedicated to the Professors
 Imre Kátai and Zoltán Daróczy on the occasion of their 75th birthday.)
- 2012: **NA61/NA49 collaboration workshop**
 Location: Eötvös Univ., Date 2012 May 14-19 (chair)
 co-chair Wigner Institut and Eötvös Univ. Fac. Inf. and Dept. of Atomic Physics
 participant: 12 countries, 50 researcher from 27 Universities, Institutions

A research team for graduate and doctoral students

We organized a group together with prof. György Vesztegombi to study the experimental particle physics by computer science for graduate students.

Foreign fellowship for students

- 2019-2021 : Forster Richárd Fellow, CERN, Switzerland
- 2015-2018: Forster Richárd Ph.D Student, CERN, Switzerland;
- 2014-2015: Forster Richárd Technical Student/Scientific associate CERN, Switzerland
- 2011-2012: Sipos Roland Technical Student, CERN, Switzerland
- 2011 Bozsogi Balázs Fellowships, Creative Electronic Systems, Switzerland
- 2010: Forster Richárd Summer Student, CERN, Switzerland
- 2010: Sipos Roland Summer Student, CERN, Switzerland
- 2009-2010: Bozsogi Balázs Technical Students, CERN, Switzerland
- 2009: Bozsogi Balázs Student program, CBM, Germany

Publication

29 articles have been published together with students.

These are available in indexed database of Hung. Acad. of Sci. (MTMT).

Program of Doctoral school

Ph.D students

- 2015-2018:R. Forster (Ph.D School of Eötvös Univ., CERN scholarship)
- Absolutorium 2018
- Doctoral topic: Parallel computing application in the experimental and theoretical physics
- Publication: 16 articles (4 WoS), 1 book
- Conference: 5 lectures, 8 posters (USA, Switzerland, Neatherlands)

Important results, articles:

- Yang-Mills lattice on CUDA,
- Chaotic behavior of the lattice Yang-Mills on CUDA,
- Jet browser model accelerated by GPU,
- Parallel k_T jet clustering algorithm

Lectures in Doctoral Schoole

- Nonlinear phenomenon on lattice
- Simulation methods
- Quantum computation

Additional activity:

- Final exam

-Academic Student League

Supervisor:

- Forster Richárd, Sipos Roland, Parallel processing of large databases, I. prize on the Eötvös Univ. (2010), Extra prize on the National Competition (2011)
- Agócs Ádám, Bozsogi Balázs, High efficiency trigger algorithms, II. prize on the Eötvös Univ. (2008), III. prize on the National Competition, (2009)

Reviewer on the National Competition

- Zakar-Polyák Enikő, Fraktálos hálózatok jellemzőinek adatvezérelt és modell alapú vizsgálata (2022)

Lecture for graduate students (1986-1993) (2003-)

1. Algebraic encoding theory, Criptography
2. Efficiency of the Algorithms,
3. Finite Fields,
4. Parallel computing,
5. Simulation methods,
6. Chaotic dynamical system
7. Fractal geometry
8. Discrete mathematics
9. Probability Theory
10. Statistical physics seminar

Special lecture:

Modeling a multi-body problem on a grid

Course-book: Discrete mathematics (2004) (Antal Járai)
